ALIENS

# Smart Aliens

Decentralized Gaming Ecosystem

[smartaliens.ai](https://smartaliens.ai)

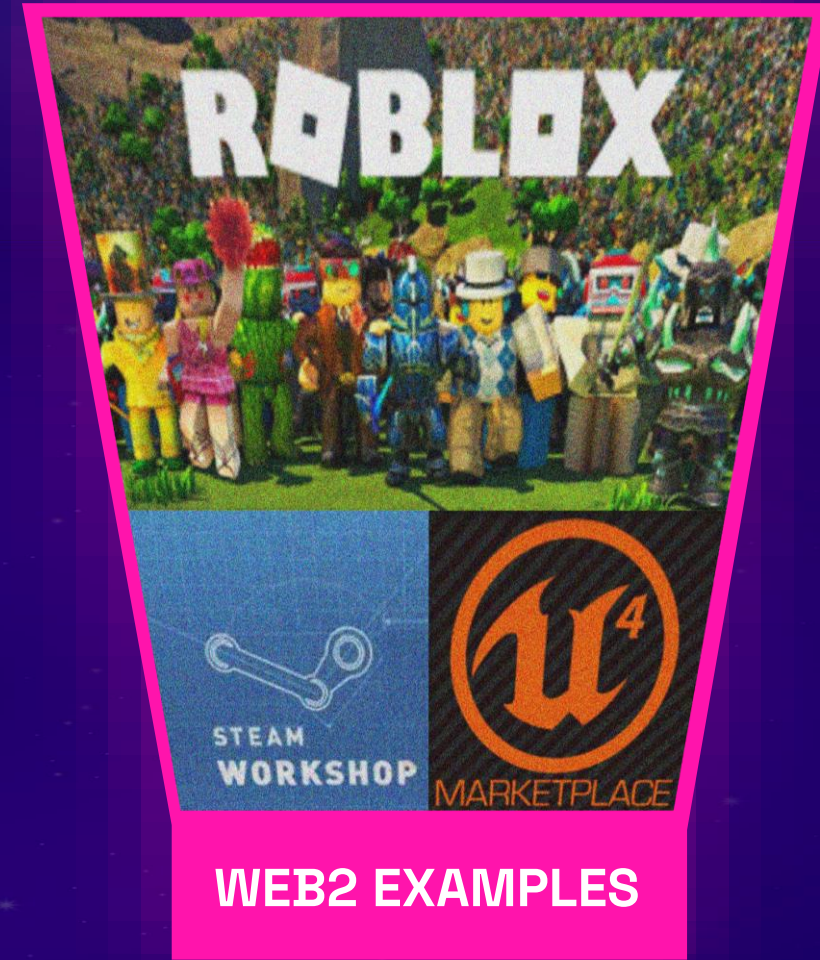

# Introduction

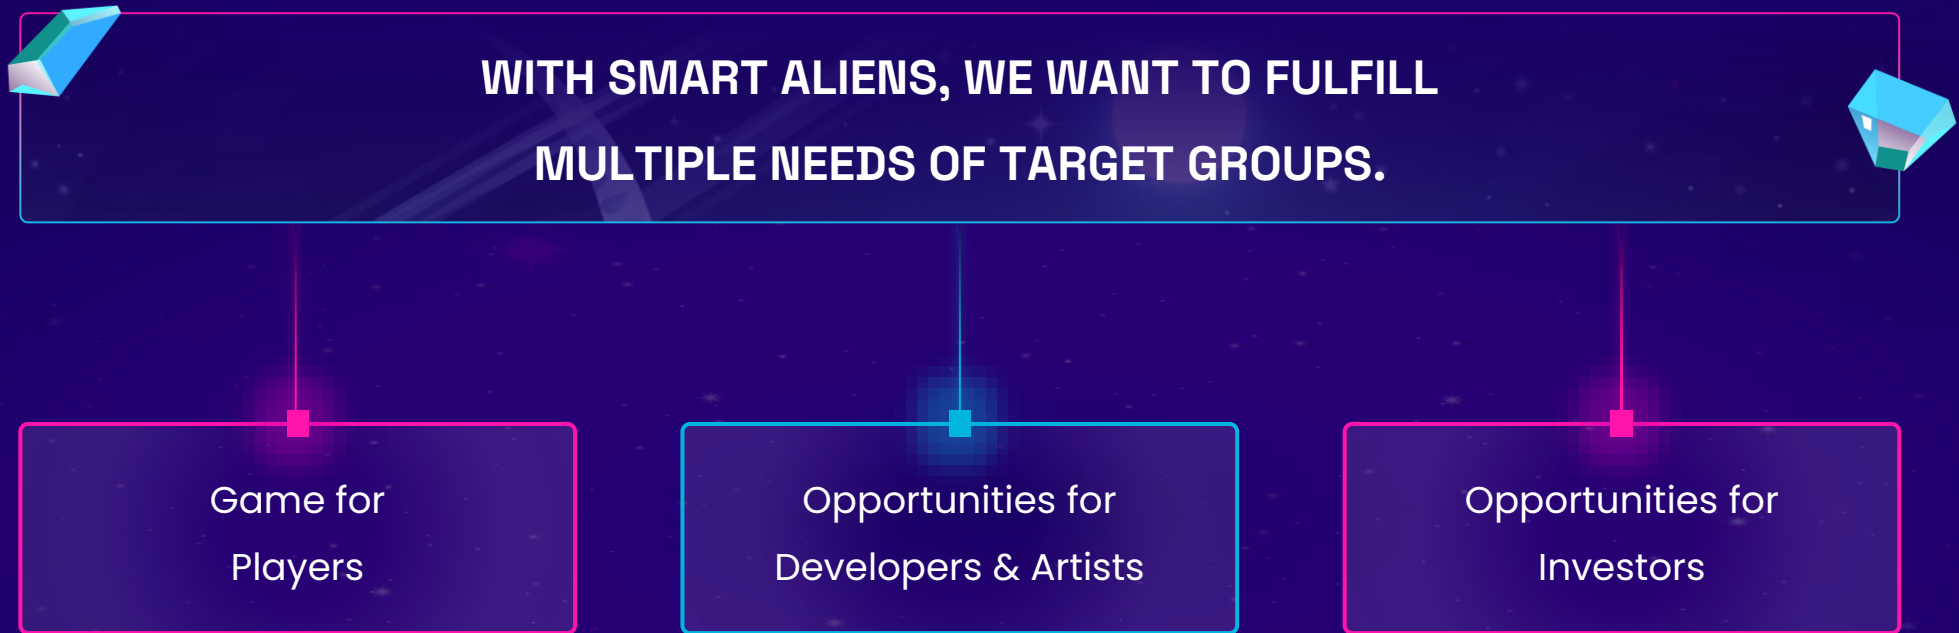

One of the greatest ways to grow a game is to make it open to the community. Several platforms, including the Steam Workshop and games like Roblox and Minecraft, have already attracted millions of content creators.

Gamers are creating mods, patching entire games, adding skins, more content, maps, and customizations.

The goal of Smart Aliens is to take this to an entirely new level, decentralizing it and using blockchain technology to address ownership issues and explore the possibility of paying creative royalties. To put it briefly, anyone can contribute to our game and even create their own using our assets. We want our community to create a Decentralized Gaming Ecosystem with us.

# Smart Aliens Ecosystem

SMART  
ALIENS

TOKEN (SAS)

# Token Explained

The Smart Aliens (SAS) token, deployed on the Arbitrum Chain, is integral to our gaming ecosystem. With a total supply of 777,000,000 tokens and a 5% tax allocated for marketing, game funding, and development, SAS is crucial for our game's success.

Arbitrum's lower transaction costs make the network more accessible and economically viable for many users. It offers significantly faster transactions compared to Ethereum. That's why we chose it, ensuring our ecosystem is easily accessible.

SMART  
ALIENS

# SMART ALIENS GAME

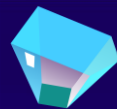

# Donut Domination

Two teams of five aliens each deploy on the battlefield with spaceships to combat the opposing team and deliver as many donuts as possible to their alien queen. The team delivering the most donuts wins. The game ends if a team reaches a set point limit or time expires.

E-Sport mechanics and game balance ensure fair play and facilitate Events and Tournaments.

Donut   
Domination is  
Smart Aliens'  
first game  
mode.

# Tournaments – Win-To-Earn

Tournaments, the core of the Game Incentive System, offer players and users substantial rewards.

To participate, users must purchase a Golden Ticket NFT and maintain an active Battle Pass on the player account.

Tournament rules, varying in rewards and duration, will be detailed in documents published before each tournament launch.

Given the NFT ownership requirement, these tournaments operate on a Medium Risk/Big Reward system.

## Example:

### Prize Pool:

\$100,000

### Access:

Golden Ticket NFT  
+ Battle Pass

### Players:

1,000

### Rewards:

Top 100

### 1st Place:

\$25,000

### Duration:

30 days

# Tournaments - Alien Boxes

## Alien Boxes, A Groundbreaking Initiative, Boosts The \$SAS Ecosystem's Revenue Streams.

Players can mint exclusive Alien Boxes on the Arbitrum chain, where our minting contracts are deployed. These boxes contain rare items, tournament ticket NFTs, and other valuable surprises like \$SAS tokens or extra rewards from our partners. Revenue from Alien Box Minting supports the Smart Aliens ecosystem's development, sustainability, and tournament prize pools.

We collaborate with Elixir Launcher, an esteemed event partner. Our tournaments not only generate revenue but also foster partnerships, explore new applications and use-cases for our coin and game, and expand our ecosystem's reach and impact. Chainlink ensures the fairness of our randomness system (VRF), to make sure that everything we do is fair and \$SAS holders enjoy it.

# Weekly Leaderboards

Player incentives include regular events with smaller, but substantial, risk-free rewards.

Every player can participate in the Leaderboard for a chance to win.

This strategy allows Smart Aliens to build a large player base, provide player goals, and maintain a safe token economy.

## Example:

**Weekly Leaderboard:**

\$2,000 Prize Pool

**Access:**

Free!

**Players:**

Unlimited!

**Rewards:**

Top 100

**1st Place:**

\$250

**Duration:**

1 Week

# Monetization - Smart Aliens MTX

In Smart Aliens. Players enjoy a seamless journey to acquire distinctive skin-Game Fiat Payments for Boundless Customization  
Elixir's in-game fiat payments unlock a world of customization ins, aliens, formidable weapons, and captivating dances.

## MONETIZABLE ITEMS:

### Guns:

Equip yourself with customized, powerful weaponry.

### Battle Pass:

Access exclusive rewards & privileges. And more!

### Skins:

Showcase your uniqueness with exclusive alien skins.

### Dances:

Move to the rhythm with engaging dance moves.

# Daoverse

The heart of Smart Aliens, which empowers our community of creators. Participate in key decisions, vote on ideas, and contribute as a SAS token holder to guarantee cooperative game progression.

## Key Features:

- › Proposal Voting
- › Community-Driven Ideas

## SAS Holder Privileges:

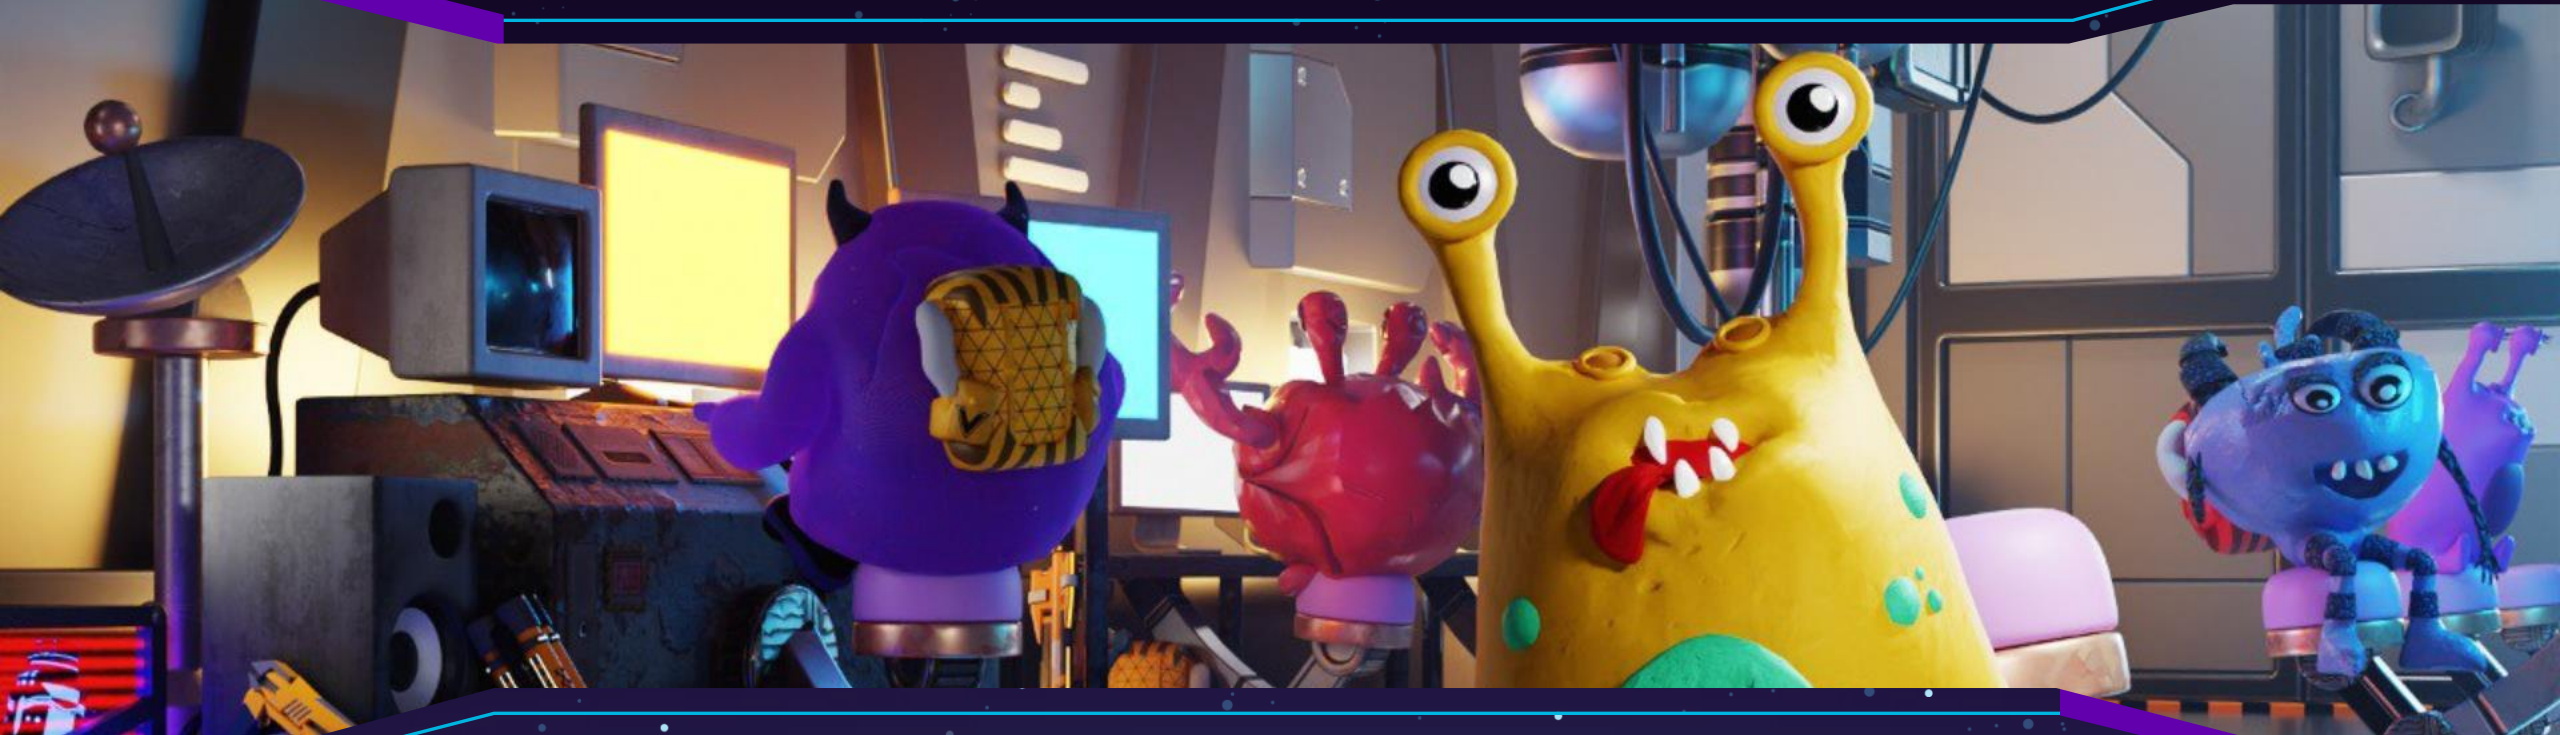

- › Influence the Game
- › Earn Dev-to-Earn Royalties

Transform players into contributors, fostering shared ownership.

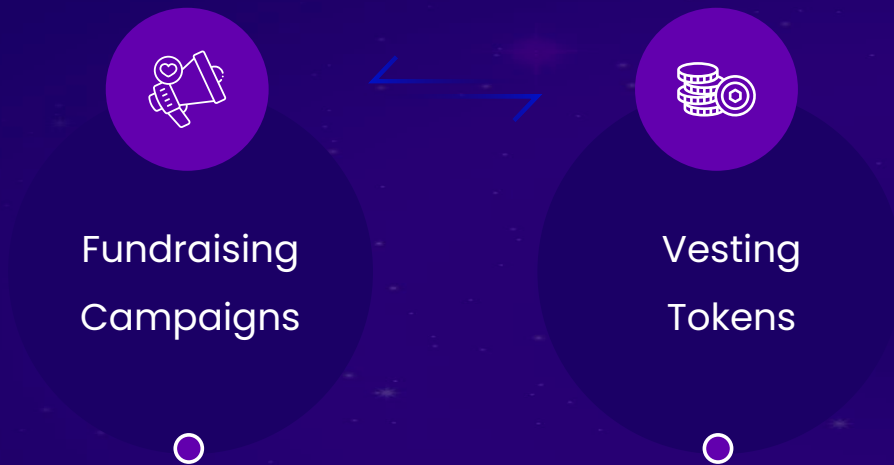

SMART  
ALIENS

# DEV-TO-EARN

# Dev-to-Earn – Fueling Innovation

Dev-to-Earn empowers developers and artists. Contribute to game evolution, fundraise for ideas, and earn SAS tokens.

## Community & Investors:

- › Vote on Campaigns
- › Compete and Collaborate

Fuel innovation within Smart Aliens, uniting creators & supporters.

ALIENS

# Future Expansion

# Mobile Version

Mobile gaming's growth has been significant, marking a global shift. Advancements in smartphone technology and increased internet penetration have made mobile games widely accessible, contributing to their popularity across diverse demographics.

According to Newzoo's Global Games Market Report, mobile gaming generated an estimated \$93.2 billion in 2021, accounting for nearly half of the global games market. This figure represents a year-on-year growth of 7.3%, highlighting the sector's dynamic expansion.

The next stage of our mission is making Smart Aliens accessible via a mobile version.

We plan to release more game modes like Housing or Open World with this version.

# New Game Modes – Housing

Social interactions are key in every multiplayer game.

With our Housing Game Mode, we will provide players the opportunity to interact with their aliens in their own houses and invite others. Aliens will live with them, learn from them, and be secured as SmartNFTs on the blockchain. Some features of our SmartNFTs in the Memory preservation via Metadata

# New Game Modes - Open World

Smart Aliens' open-world mode will be integral to the experience, closely tied to our Daoverse system and AI solutions.

This compelling mix of tycoon and open-world gameplay will let you share your world with diverse Aliens, who develop unique personalities via our advanced Inworld AI technology.

The Massively Multiplayer Game Mode will facilitate player interaction, trading, conversation, & various minigames.

# SmartNFTs - AI Implementation

SmartNFT, a new generation NFT, will develop its character as players interact.

Each player action will prompt the SmartNFT to learn and evolve its code via our game's AI system.

01

03

All data will be secured on the Blockchain, enabling transfers/trades to other players.

02

04

Each SmartNFT Alien will be unique, possessing its own history, character, and feelings.
